

LEGAL \neq REGULATED

Marijuana is now legal in New York State for use by adults age 21 and older. Just because it is legal, don't forget that it is still addictive and not being monitored by the Food and Drug Administration (FDA).

DOSING CAN BE INCONSISTENT

Due to the inconsistent ways that marijuana products are produced, doses of the same product may have drastically different results.

MARIJUANA HAS NOT BEEN FDA APPROVED TO TREAT ANY DISEASE

No legitimate science exists to validate medicinal cannabis greater than 10% THC.

(Elizabeth Stuyt, MD Addiction Psychiatrist Salida, Colorado, June, 2022)

MARIJUANA PLANTS OFTEN CONTAIN MOLD AND OTHER TOXINS

Due to how the product is picked, dried, packaged and sold, it often contains mold and other toxins.
(<https://ehp.niehs.nih.gov/doi/10.1289/EHP5785>)

PRODUCT LABELS MAY BE MISLEADING

THC products are not currently FDA regulated. Some products may have higher THC concentrations than their label states leading to unpleasant symptoms or accidental overdose.
